

[Ambi-hi-lo Chamber Manual](#)

Belts

▲ WARNING

To avoid serious personal injury, be sure to relieve all system pressure then lock out power and tag compressor to prevent unexpected movement of the unit.

Inspect belt tension after first 30 hours of operation then at every 1,000 hours.

1. Check belt tension on each individual belt in the center of each pulley, and should have ¼" deflection up and ¼" deflection down, for ½" total.
2. Always replace all belts with the same brand, at the same time. Make sure belts are unmatched. Do not replace belts independently.
3. Do not splash lubricating oil on belts or pulleys when adjusting or replacing belts.

System Pressure

System pressure is factory set but can be regulated depending on operating conditions. Refer to computer control specifications for setting adjustments or PLC operating manual.

Safety Valve

▲ DANGER

TO AVOID SERIOUS INJURY OR DEATH, NEVER ATTEMPT TO REGULATE OR TAMPER WITH SAFETY VALVE. VALVE IS SEALED AND CERTIFIED BY ASME CODE AND IS DESIGNED TO RELIEVE SYSTEM PRESSURE WHEN NECESSARY.

Air/Oil Separator Filter

▲ WARNING

Air/Oil Separator tank is a pressurized component. To avoid serious injury, be sure system pressure is relieved before removing filter. Be aware oil temperature may be very hot. Use caution when changing filter.

1. Relieve all air pressure from air/oil separator tank, then wait approximately 5-10 minutes before replacing filter.
2. Replace air/oil separator filter. Do not attempt to clean.
