Such a fun game that's unfortunately riddled with frequent crashing and freezing.

My game just froze at the final boss, and I'm very frustrated with the number of times I had to replay a mission due to this problem occurring over and over again. Progress within a mission not being saved doesn't help either.

I'll probably keep playing, beating the final boss, getting some side missions done and whatnot, but the frustration from the freezes and crashes is a bit too much. Such a shame, because the game itself is quite fun. :(spoko gra za 3 zlote na pzrecenie elo. i blame the game for not getting though the escape mission when the walls come in.

everything else good.. Game keeps crashing. I can't play for more than 15 minutes. Waste of money!. Good game, but the co-op barely works. Crashes if you die and sometimes in loading screens, this means that the achievements are almost impossible to get.

This game, takes the original Saints Row 3 map, and uses it as it's main basis.

For some this may be a turn off, but with the many elements of super powers added into your character, takes this game unto a whole new level. New Heights have been reached (no pun intended) in this game!

I would recommend this game whole heartedly!. I bought SR4: Game of the Century Edition for \$5.

I enjoyed playing for about 45 hours doing all sidequests, collecting all collectables. Going after "achievements". (I don't have them all, but I lack the skill to get "Gold" in all minigames)

I'm probably about done with the game and close to uninstalling. A good purchase.

The weapons in the game all feel good, all feel different. They had different uses, so my play style favored some over others but I could see why some might primarily use all different weapons.

The super powers are a blast. I love being The Flash zooming all across the city, though I kept using cars quite a bit too because why run when you can drive a cool car? Even when I could leap really high\far and glide long distances I drove sometimes. I delighted at speeding up to people picking them up and dropping them hard, killing them. Throwing fireballs, freeze blasts, etc. Over the top crazy fun.

I want an expansion DLC campaign for this game based on the same crazy premise!

I loved the Santa DLC.

A downside is I thought the pixelation effect of people\things in the game for the matrix "glitching" happens too much.

An even bigger downside is the game is very shallow, and short. If you stick with the main campaign quests, you can probably finish very quickly. All the quests involve the same few activities and maybe introduce you to a new activity. There are a bunch of minigames that are fun.

The pacing of the abilities and super powers is a bit odd. I got infinite sprinting from a sidequest before I got stamina upgrade 3 & 4. Though stamina is still useful for things other than running. I still don't have all abilities unlocked. They say do more challenges to unlock them. I literally have no more quests so at this point it's just f***ing around ending up being shoot people until aliens show up, then more and more heavy stuff shows up, then a warden - a big monster miniboss that I'm so sick of at this point - appears making all other aliens vanish. You fight it like the dozens of other times you've fought it. There's no ignoring it once it appears. This clears your Wanted level or whatever they call it once it's defeated.

Repeat.

This just means I've completed the game I guess, no matter how much I want to milk a bit more enjoyment out of it, because as I said I enjoyed my time.

Edit: The soundtrack is amazing in this one. Most songs I hadn't heard before, but I love so many. The soundtracks for these types of games are essential to a good time. This one delivers across the various genres \ "radio stations".. Well, I'm loving the game play honestly. Even in 2019. This and Gat out of Hell have been a blast (I've never played any Saint's Row games). There's so much mindless fun to be had that I would play for hours on end... if I could...

It's 2019, I have an i7-7700K, 32Gb of fast RAM, an RTX 2080, and play off an SSD. And both this and Gat out of Hell freeze... for no reason. They just freeze after a little while. If I could play them without being interrupted by this it'd be fantastic but I can't. So I cannot recommend it.. If you're considering whether or not to get this on sale, don't even think twice. getting this for under \$5 is a total steal.

In this game, you're essentially Superman with magic powers, and armed with John Wick's arsenal of weapons (if he went Joker insane). Want to run up buildings? Fly? Superhero landing into a nuke? Shoot\u2665\u2665\u2665\u2665\u2665 with metal music? There're just so many things to do in this game that it's unlikely you'll ever find yourself bored.

And yes, the plot in this game kinda kills the odds of plot continuity, and there's barely any challenge, but god damn, this game is fun as hell.. i dont know if this is a me problem or not but the video freezes but not the audio and it just stops the game from running, its a real shame because i love the saints row games and it just doesnt work FeelsSadMan. Garbage. Getting a refund. I have no idea why the game bloody microstutters every few seconds.. gta in steroids. GOOD POINTS:

-
- Fun
 - Good character customization
 - The powers are cool
 - Pop culture references are nice

BAD POINTS:

- The game is sorta all over the place plot wise. Expect a lot of random things. If you like a more coherent story with continuity then this isn't for you

. I like this game more than SR3 but honestly it's not worth more than 5\u20ac due to huge amount of bugs and crashes in coop, so not recommended unless it's on sale for the price i mentioned above.. it's fun for the first few hours, but it get's boring fast you can totally tell they just built upon an existing DLC to make this, the game is basically saints row 3 with super powers, same map, just different colours.

lifeless world

bland story

i literally have to force myself to play at this point

oh and the minigames, challenges and collectible items are bland....yeah rally fun jumping 5 feet to get another cluster over and over again.... i would say get 2 but unless you want to download a fan made patch to get it to run right on modern PC's just get the third one, way better than this one, even if that was when the franchise started to decline.
