A: Sorting on the `_id` field is fast and it is what you need since you are looping only once. You can use the `$in` operator to do this: `db.table.find({'_id': {'$in': arrayOfIDs}})` Otherwise, do: `db.table.find({'_id': {'$in': arrayOfIDs.map(function(id){return new ObjectId(id);}}})` A remote control or similar type of human-machine interface (HMI) has been used to control a machine, such as, for example, a piece of construction equipment.
